Molded Fiber Glass Companies Commemorating 70 Years in Composites Manufacturing Industry

ASHTABULA, Ohio — July 12, 2018 — Molded Fiber Glass Companies (MFG) is celebrating its 70th anniversary this year. Founded in 1948 in Ashtabula, OH, the family-owned company now employs nearly 2,500 teammates at thirteen manufacturing facilities across North America. In addition to the manufacturing plants, two dedicated in-house support facilities - MFG Research and MFG Design Center - are among the largest and best-equipped in the composites industry.

MFG has been a leader in the evolving world of composites, creating entities to serve specific market needs including parts and products for automotive, commercial truck, HVAC, material handling, construction and water treatment, and wind energy turbines.

In the area of development of composite materials for new applications, MFG is a recognized pioneer, notably for automobile body and structural parts, pleasure watercraft, commercial long haul trucks and wind turbines.

The company is a long-standing member of the American Composites Manufacturing Association (ACMA) and continues to actively support the expansion and standards of the composites industry at large.

During the past 70 years the company has contributed in many ways to the communities where MFG has operations.

About MFG

Molded Fiber Glass Companies is a leader in the field of reinforced plastics and composites, serving diverse markets with a variety of composite material systems and processes. A family-owned business for 70 years, the company has thirteen operating entities throughout North America and is headquartered in Ashtabula, Ohio.
